Here is a groundwater pH map made from water quality portal data. It is pretty coarse resolution. I have the underlying data. We are only interested in the Florida and Texas citrus growing regions. I will try to get a better map of just those areas.

**Subject:** aldicarb well set-back

The following info from the label, so what will be the proper well set-back for GW modeling – 1000 ft?

**Do not apply within 50 feet of any drinking water well. More restrictive setbacks may apply. See the *Environmental Precautions and Soil Type Restriction Tables*.**
